

Chronosphere Quick Start

The transition to a new observability platform can be a challenging task. To help you overcome these obstacles and unlock the full potential of the Chronosphere platform, we are proud to introduce the Chronosphere Quick Start program.

Quick Start is a comprehensive onboarding and migration program designed to ensure a seamless transition to the Chronosphere platform. By addressing common challenges, offering tailored support, and delivering a proven methodology, Quick Start empowers organizations to unlock the full potential of Chronosphere’s cloud native observability solution in a timely and efficient manner.

Challenges Addressed

- Fear of adoption and change**
 Quick Start eases concerns with tailored training and enablement for a smooth and confident transition.
- Lack of experience**
 Customized training and ongoing enablement help you become proficient with Chronosphere, Prometheus, PromQL, OpenTelemetry and Grafana.
- Migration effort**
 Our Quick Start program offers a comprehensive technical migration plan that alleviates much of the burden on your team.
- Time-to-value**
 Our Quick Start program is designed to help you realize the full potential of the Chronosphere platform within weeks, ensuring a timely ROI.

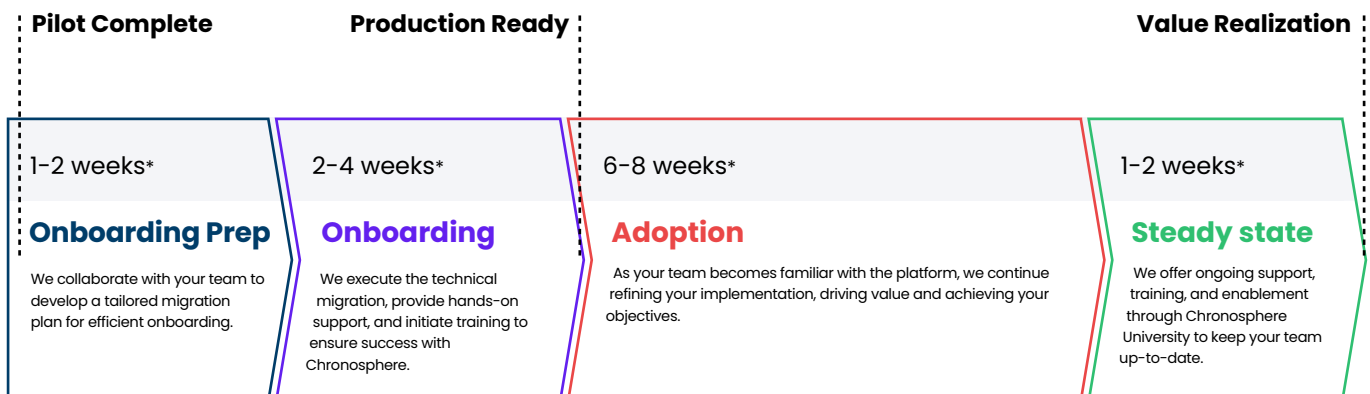

Key Benefits

- Faster Time-to-Value**
 By streamlining migration and onboarding into manageable stages and leveraging Chronosphere’s expertise and hands-on support, Quick Start enables organizations to experience the full potential of Chronosphere within weeks, driving value and ROI more rapidly.
- Reduced Migration Effort**
 Our comprehensive technical migration plan alleviates much of the burden on your team, ensuring a smooth and efficient migration process. We work alongside you to address challenges and offer hands-on support every step of the way.
- Improved Adoption & Proficiency**
 Our personalized training and enablement sessions cater to your team’s specific needs and skill levels, ensuring that everyone can confidently and effectively utilize the Chronosphere platform.

 With continuous enablement through Chronosphere University, your team will also stay up-to-date and informed as new features are introduced.

Timeline & Milestones

*timeline is subject to change based on environment.

Quick Start Components

Quick Start offers a structured and proven approach to migration, onboarding, and training, ensuring your organization can quickly and fully capitalize on the benefits of our cloud native observability platform.

Technical Migration

Our guided four-step technical migration process includes:

- **Data Ingestion:**
We'll help you configure data ingestion pipelines, making sure your monitoring data is accurately and securely transmitted.
- **Data Control:**
We'll guide you in establishing data control mechanisms like metrics quotas and retention policies that meet organizational needs and regulations.
- **Data Visualization:**
We'll help create insightful dashboards using Chronosphere's visualization capabilities for efficient monitoring and issue resolution.
- **Operational Setup:**
We'll support you in configuring alerts, notifications, and integrations with your incident management tools for prompt critical issue awareness.

Training & Enablement

Quick Start delivers tailored training for operators and developers, emphasizing continuous enablement through:

- **Chronosphere University:**
Leverage our online learning platform with a customizable curriculum of interactive content, quizzes, and exercises for skill development.
- **Live Training Sessions:**
Receive personalized, instructor-led training tailored to your team's needs, allowing you to dive deeper into specific topics.
- **Documentation and Guides:**
Utilize a wealth of documentation, guides, and tutorials from initial setup to advanced use cases.
- **Dedicated Support:**
Obtain ongoing assistance from our customer success team during your Quick Start journey.

"Chronosphere excelled in partnering with us on the entire migration process. Their instructor-led continuous enablement was world-class and made our job of supporting internal devs easier."

Head of Infrastructure and Platforms

About Chronosphere

Chronosphere is the only cloud native observability platform that puts engineering organizations back in control by taming rampant data growth and cloud native complexity while accelerating innovation. Faster alerts and issue resolution ensures responsive and reliable cloud native workloads underlying the most valuable services at leading organizations like DoorDash, Robinhood, and Abnormal Security. Teams at organizations of all sizes trust Chronosphere to help them drive competitive advantage and world-class customer experiences while reducing engineering burnout and eliminating lock-in.
